

FUMISPORE HA PRODUCT CERTIFICATE

FUMISPORE HA

- Contains 4% of glycolic acid.
- Has been tested for virucidal efficacy according to European Standard EN 17272 on Adenovirus type 5, Murine norovirus, Human Coronavirus HCoV-229E. The results conclude that **FUMISPORE HA at a concentration of 1.2 g/m³** for a minimum contact time of 15 hours in the presence of an interfering substance of "clean conditions" type, at a temperature of 20°C.

In the absence of the possibility to test the product on the new Coronavirus, we consider that **FUMISPORE HA** can be applied as a preventive measure, after a cleaning step, on sensitive surfaces for which a Coronavirus risk is suspected.

This certificate is issued for all due intents and purposes.
